AL PINE UTILITY SERVICES SDN. BHD.

Drone Aerial Inspections

A reliable, cost effective and time efficient custom designed surveys for our clients with the UAV and GPS methods.

Inspecting large and complex structures systematically with real time footage; and the data is available for On-Site Engineering Team review. Zoom in capability to provide details to area, if necessary.

All data is available in 2D maps and 3D virtual models for critical evaluation and decisions.

Services that we provide:

- Aerial Progress Monitoring
- Orthomosaic Mapping
- Tower/Silo Inspections
- Flare Stack Inspection
- Roof Top and Cooling Tower Inspections
- Stock Pile Calculations
- Custom Made Inspections
- Retaining Wall Inspection
- Slope Inspection
